Food Safety Regulatory System of China
Food Safety Law of the People’s Republic of China entered into effect on June 1, 2009.

Food producers and traders are specified as the number-one responsible for the food safety, shall strictly follow relevant laws and regulations and food safety standards in their food business activities, be responsible for the public and society, ensure the food safety.
Government established the system on sectional supervision and management of food safety in China, with the characteristic of harmony, sectional supervision and management.
State Food Safety Commission was set up under the State council in February, 2010.
- a state-level food safety organization.
- to oversee nationwide food-safety monitoring.
- consisting of three vice premiers and a dozen minister-level officials.
Ministry of Health is responsible for the overall food safety coordination nationwide, including,
- food safety risk assessment,
- development of National Food Safety Standards,
- food safety information dissemination,
- development of accreditation criteria for food testing agencies and testing specifications,
- the organization of investigation of and response to major food safety accidents.
Ministry of Agriculture is responsible for regulating primary agricultural products for consumption.
General Administration for Quality Supervision, Inspection and Quarantine is responsible for regulating food production.
General Administration for Industry and Commerce is responsible for regulating food distribution.
The State Food Safety Administration is responsible for regulating catering service.

Food Safety Regulatory System of China

MOA → AQSIQ → SAIC → SFDA

State Food Safety Administration is responsible for regulating catering service.
Local governments at and above the county level take full responsibility for food safety within their jurisdiction. Including,

- To take integrated responsibility, leadership, organization, and coordination roles in regulating food safety and dealing with food safety emergencies;
- To establish a mechanism on the regulation of food safety during the whole food chain;
- To develop a food safety accountability system that evaluates and examines the regulatory agencies related to food safety.
